## Career Objectives

To make use of my interpersonal skills to achieve goals, enhance my skills and abilities in the industry which offers professional growth while being resourceful and flexible. I am always fascinated towards the continuous learning process and capable of working in a team.

## Professional Profile:

- **2.7+** years of experience as a Software development Engineer i.e. Web-based applications and associated technology components. Distributed Architecture Applications using **Java and J2EE**.
- Responsible, Creative, Result-oriented professional.
- Experience in using **Agile SCRUM** methodology for developing the application.
- Good Experience in **J2EE Technologies (JDBC, JSP, Servlets)**.
- Good Experience in working with **Spring Framework (Core, AOP, JDBC, Transaction, MVC, ORM, Spring Data JPA, Security, Spring Boot, Spring Rest)**.
- Knowledge of **Micro Services Architecture**.
- Good experience in working with **Spring Internationalization** to render content of our application in various different locale.
- Worked on tiles based application using **Apache tiles and Spring**.
- Implemented **Validations** using **Spring Validator**.
- Worked on **Spring security** for login pages in different modules of application.
- Developed **Asynchronous Programming** based **API** using **Spring event processing**.
- Hands on Experience in **Spring Boot**.
- Extensive Experience in using **MVC (Model View Controller)** architecture for developing applications using **JSP, Java Beans** and **Servlets**.
- Expert in working with **XML (DTD, SCHEMA)**.
- Developed **Restful Web Services (Resource and Client)** and have hands on Experience on it.
- Good knowledge around **Gang of Four Design patterns (Singleton, Factory, Strategy, Builder)**, **JEE (Front Controller, Application Context)** and implemented some of it as part of application classes.
- Excellent experience in client interaction, requirements gathering and development.
- Hands on practice in **JUNIT**.

## WORK EXPERIENCE:

- Working as a **Software Developer** in **Tekoptimize Software India Pvt Ltd**, Hyderabad from May 2017 to till date.

## Technical Skills:

Languages	Java, SQL
Client-side Technologies	HTML, CSS, Bootstrap, JavaScript, JQuery, JSON
Server-side Technologies	Servlet, JSP
Development Frameworks	Spring (Core, AOP, JDBC, Transaction, ORM, MVC, Security)
XML Technologies	XML, SOAP, WSDL, DTD, XSD
Web Service Testing Tools	SoapUI, Postman, Advanced Rest-client
Design Patterns	MVC, DAO, Singleton, Factory, Factory Method
Databases	Oracle, MySQL,
Logging Frameworks	Log4j.
Unit Testing Frameworks	Junit
IDEs	Eclipse, STS, SQL Developer
Build Tools	Maven
Agile Methodologies	Scrum

## Education:

- **B.Tech** (ECE) with aggregate 68.9% in 2012 - 2016 from JNTU, Hyderabad.
- 12th with aggregate 54.2% in 2010 from Tulsi Vidya Niketan Jaunpur UP
- 10th with aggregate 60% in 2008 from Bal Niketan High School Varanasi UP

## Project Details:

### Project 1 :

Project Name	: COZYON
Role	: Java Developer
Technology	: Java , Spring
Server	: Wildfly
Database	: MySQL
Team Size	6
Environment	: Windows

### Description:

**Retail Clothing Store Service (Cozyon)**, this project deals with new channels of business for the local merchants/weavers/hawkers in the Clothing market, so that more reach of fashion to the customer. It provide information about newly arrival of clothes in their local area. Local merchant have to register on this platform in order to sell their clothes from our website with a valid business name. With their respective business so that the customer will able to reach to merchant store through this platform. In this system we added the new functionalities/features to create the competition to the existing fashion market locally. This

platform also offering multiple option of buying any product, even they can buy a product from the local weavers/hawkers, Most interesting part of this project is that it deals with try and buy option. Customer can choose the product for only 'try' also.

### Responsibilities:

- Firstly developer was responsible for requirements analysis, interacting with client /onsite team to validate the understanding and actively involved in the development of the module.
- Started application developing in MVC architecture using Spring Annotations and XML configuration.
- Used JSPs for the front end development
- Created the Maven Architecture for entire application in different modules using build tool Maven
- Wrote validation Using **Spring MVC**, security using **Spring security**, mail engine using **Spring mail**
- Worked on asynchronous event processing using **spring event processing**.
- Created JNDI Data Sources to multiple databases (MySQL) in Wildfly server.
- Worked on **spring transaction**.
- Configured logging framework Apache Log4J to track application execution flow.
- Configured the JMS one to one communication in application using Wildfly server.
- Contributed in code review.
- Responsible for writing business logic for retrieving the data from database.
- Written Soap based web services to expose our services to other applications.

### Project 2:

Project Name	:	Food Catering Service (FESTIOT)
Role	:	Java Developer
Technology	:	Java, Spring MVC, Spring AOP, SOAP web Services
Server	:	Wildfly
Database	:	MySQL
Team Size	:	8
Environment	:	Windows
Duration	:	Sep-2017 to Aug-2018

### Description:

Festiot provides, transports and prepares all type of food for clients as per the request and particularly for events as per the requirement of people. Responsibilities may include not only providing and preparing food but also serving it too. Responsibilities may include not only providing and preparing food but also serving it and clean up as per client requirement. FESTIOT may also work with clients directly to deal with special request and create menus for special events.

### Responsibilities

- Involved in Scrum activities like daily scrum meeting of the project.
- Used Webjars.for client side libraries.
- Involved in beans layers to create bean classes.

- Involved in writing DAO classes.
- Worked on Integration layer to developed SOAP web Services.
- Written WSDL document for documenting the details provider.

### Personal Details

Gender : Male  
Marital Status : Single
