## Carrier Objective

Seeking a challenging position that allows me to perfect my skills in the field of Software Developer. I want to work with your progressive organization where I can utilize my experience of (around 4 .5 years) knowledge and skills for the mutual benefit of the company and myself.

## Experience Summary

➤ Currently working at HotelHub LLP at Silk Board, Bengaluru, as a JAVA Plug-in developer. (**Around One Year**).
➤ I was worked at Till and Aisle Technology at Kolathur, Chennai, as a JAVA / J2EE developer. (**One Year and Seven Month**).
➤ I was worked at Geetham Software Pvt Ltd at Kolathur, Chennai, as a JAVA developer. (**One Year and Eleven Month** ).

## Project Worked

| Project Title | GDS Plug-in  [Connect Hotel NG] |
|---|---|
| Company | HotelHub LLP, |
| Customer | Multiple Clients |
| Domain | Travell, |
| Period | June-2018 to till date. |
| **Description** | We developed plug-in application to promote hotel availability. To do this, we are listen the list of cryptic command from GDS  terminal, if the commands are listed in the app store, we stop the command and process the data as per requirement, then control return back to the GDS, based on the information collected from GDS, we are display the Promotional window.  Connect Hotel NG is not only for displaying promotional offers, but also we can able to complete all hotel booking related transaction, without minimizing the GDS terminal. To achieve this we integrated browser plug-in, inside the gds terminal and open the browser window. The GDS terminal is type of Eclipse application, there we can do whatever we doing the eclipse Id like typing command and displaying UI in view part. This application is not a standalone application, because which runs inside the GDS terminal. It is used by the corporate peoples who are doing their business travels. |
| **Technology** | Java 8, Eclipse RCP, Java FX 2 and Agile Methodology |
| **Role / Responsibility** | ➤ Participated in project planning sessions with business analysts and team members to analyze business IT Requirements and translate business requirements into working software Application. ➤ Implemented Business Delegate layer using POJO objects. ➤ UI Designing based on the BA requirement |

| | |
|---|---|
